

## **ANTINFLAMMATION AGENTS**

### **ABSTRACT OF THE DISCLOSURE**

Compounds, compositions and methods that are useful in the treatment of  
5 inflammatory, immunoregulatory, metabolic and cell proliferative conditions or diseases are  
provided herein. In particular, the invention provides compounds which modulate the  
expression and/or function of proteins involved in inflammation, metabolism and cell  
proliferation. The subject compounds contain fused carbocyclic or heterocyclic rings.
